Price Proposal

Respondent: Network Digital Security, Inc.

Solution Proposed: HighWire EDR Managed Service

Service Category: Service Category 3: Endpoint Detection and Response

Tiered, not to exceed pricing for **initial** term: Available for 12-month, 24-month, 36-month options for initial term.

The Quantification unit “devices” for L3 refers to devices with the end-point agent deployed. Endpoint agents will be trued up on actual total deployed agents based on the maximum deployed licenses in the console. An upper bound can be established to ensure the contracting party does not mistakenly jump into the next tier. True-up to the next tier (ex. 1-50 > 51-150) will follow once curation efforts have been completed. Includes basic onboarding.

Tier	Price	Unit

Up to 150 (51-150)	\$ 18,000.00	Devices per Year

Price Proposal

Respondent: Network Digital Security, Inc

Solution Proposed: HighWire Networks SASE Managed Service

Service Category: Service Category 10: Secure Access Service Edge (SASE)

Tiered, not to exceed pricing for **initial** term: Available for 12-month, 24-month, 36-month options for initial term. Best effort has been taken to produce a rate-card for SASE that is accurate, however, the realities of this service tier are dramatically more complex and dynamic. That said, these should serve as good “worst case” bounds for general SASE. Each tier includes remote licenses for all users, HA hardware for a site (or multiples in the case of the larger packages), appropriate bandwidth for fully inspecting all remote and on-premises traffic, IPS/NGAM CASB and DLP. Significant modifications can be made to that scope resulting in drastically different pricing options. The quantification “Users” is in reference to human users that need remote access or remote security, given the scoping constraints listed above.

Solution Proposed: HighWire Networks Vulnerability Management Managed Service

Service Category: Service Category 13: Vulnerability Assessment and Management

Tiered, not to exceed pricing for **initial** term: Available for 12-month, 24-month, 36-month options for initial term. The Quantification unit "Devices" for Vulnerability Assessment and Management refers to services and devices discovered via the various scanning methodologies discuss in L1, L2 and L4 scanning services. Upper (maximum) bounds, along with scan target list curation, can be established prior to deployment to ensure no overages are automatically charged. True-up to the next tier (ex. 1-50 > 51-150) will follow once the curation efforts are completed. Pricing in L13 and service deployment is shared with L1, L2 and L4. Externally discoverable assets, Network-based and agent-based discovery share the same platform in this proposed service. Includes basic onboarding. *Optional* items (Prompt L13:P7) have been added to address the desire to patch discovered application vulnerabilities.
